### Service Interruptions:

#### **Communications Outage, Modoc County Sheriff's Office, Modoc County**

On 08/16/17 at 1719 hours, Modoc County Sheriff's Office advised that they are suffering a communications outage due to a fire that burned through a fiber optic cable.

- At 1941 hours on 08/16/17, Cal OES 911 Branch advised:
  - Land line 911 service is working with intermittent Public Safety Answering Point (PSAP) contact.
  - Technicians are arriving on scene at the cut fiber location, pending Fire Department approval, they will begin work on repairing the cut fiber.
  - At 2034 hours, Frontier and AT&T have advised their Estimated Time of Restoration (ETR) will be 0400 hours on 08/17/17.
- At 2017 hours on 08/16/17, The Cal OES Telecommunications Duty Officer (Cal OES TDO) made verbal contact and is currently coordinating with the Modoc County Telecommunications Technician.
- Also, a Public Safety Communication (PSC) trouble ticket has been issued regarding the OASIS issue, they are able to call out but not receive, the Cal OES TDO suspects this may be a dish alignment or power issue.
- Both, the Cal OES TDO and Modoc County Technician are in communication and coordinating with the satellite provider to fine tune as necessary.
- At 1249 hours on 08/17/17 per CA 911 Branch:
- Frontier Communications advised they have Three Tech Teams on site working on the issue.
- Two teams are addressing the fiber cut and one team is working on a copper line that was also burned. ETR is still 0400 hours 08/17/17.
- At 0146 hours on 08/17/17 CA 911 Branch advised that AT&T and Frontier Communications have confirmed the damaged lines in Modoc County have been restored and the PSAP and 911 are both reachable.

# WEATHER SYNOPSIS BY REGION

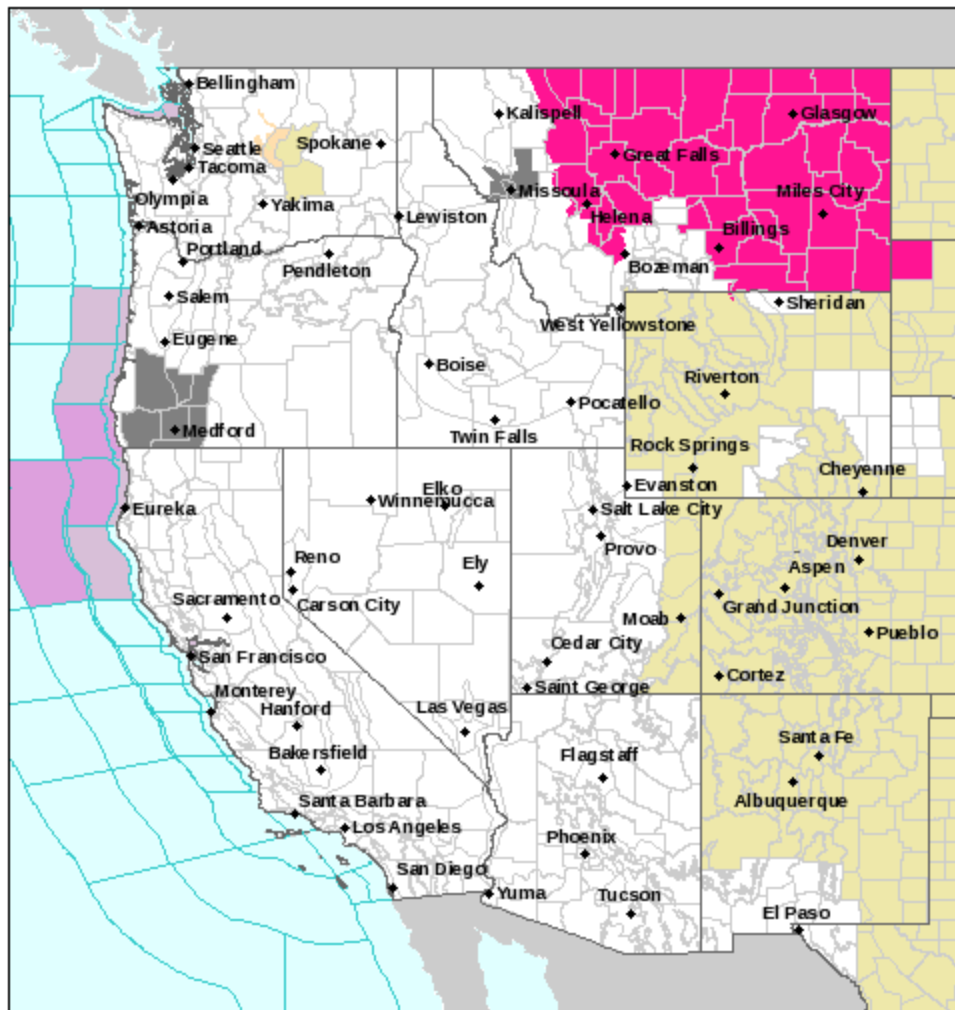

## **NORTHERN CALIFORNIA**

Isolated Thunderstorms possible most afternoons the next 7 days, mainly near Tahoe through Saturday, then becoming more widespread. A relatively dry northerly flow will be over the region through tomorrow as high pressure noses eastward over the region from off the Pacific. However, moisture lingering over the Sierra will continue to foster a small chance of isolated daily afternoon and evening thunderstorms, mainly in the greater Tahoe area, but they could also occur as far north as the Mt. Lassen area. A small and mostly dry trough will arrive over the region this weekend with cooling starting, but slowly. The chance of isolated afternoon and evening thunderstorms will increase for over more of our eastern areas Saturday and again Sunday. A low will cut off from the trough off the central California coast early next week, and moisture is expected to rotate around that into the region to spread more moisture and chances of showers or thunderstorms to most of the region Monday then back primarily to the northern and eastern mountains next Tuesday. Winds will generally be quite light this week, but somewhat breezy, gusty northerly winds be over the NW areas with poor overnight RH recovery in the very far NW today. For the most part, the marine layer will probably stay fairly deep at least south of Cape Mendocino for the next few days. Warmer weather will prevail overall across the Geographic Area through the weekend with the warmest inland areas a bit above normal at 100-105 degrees. Poor air quality near active fires will continue or become somewhat worse, but may improve somewhat this weekend as more wind and instability help increase daily smoke dispersion.

## **SOUTHERN CALIFORNIA**

Expect a gradual reduction in marine layer coverage and an increase in temperatures over the next few days as high pressure off the coast moves a bit closer to California. Temperatures will warm 3-5 degrees today with highs back in the 90's in the valleys to close out the work week. Fewer storms are expected today and tomorrow. The storms should remain above 9,000 feet and will dissipate quickly. Over the weekend, warmer temperatures may result in an increase of instability, resulting in an increase in wet thunderstorms in the Sierras. By Saturday and Sunday, scattered storms will be possible as far south as the Sequoia N.P. No storms are expected away from the Sierras throughout the extended period. Temperatures this weekend may climb into the mid and upper 90s in the valleys, but cooler weather may return early next week.
